## National Instruments (NI) Consultant Partner

Makkal has partnered with NI to provide consultation and project execution using world-class LabVIEW & TestStand software architecture. Our team is at your service for any test and automation framework developments or enhancements in your industry.

### LabVIEW

LabVIEW is a graphical programming language which can speed up your faster test and automation requirements in turnaround in few hours.

We have in-house engineering team with certifications as

- Certified LabVIEW Developer (CLD)
- Certified LabVIEW Architect (CLA)

### TestStand

TestStand is a test sequencer tool that can ramp up your any sequencing needs at faster rate.

We have in-house engineering team with certifications as

- Certified TestStand Developer (CTD)

# Training & Team Building

## 0-80% Upskilling

Enabling your team to upskill from Level-0 to a productive team.

We use indigenous method **ByteSizeHackathon** 2-hr timebox recursive event on weekly basis to improve the team skillset.

## Team Building

Reducing the communication challenges between the teams and improve team co-ordination by working closely among each team members.

## Test Automation

### Automate by Digitalization

When your factory is still in old way operation and catching up the digitalization.

### **Transform Operators Centric → Automated Machines.**

The technologies we use can enable transformation of more manual centric operations to automated fashion.
